

JDN Mining Hoist

JDN 'M' series air hoists have been specifically developed for underground operations where loads must not only be lifted and lowered but also pulled horizontally. Due to their multiple applications they are also deployed in most industrial fields, have the same features as the PROFi Hoists but operate with only 4 bar of air pressure.

Features

- Manufactured in Germany under strict quality control with demanding tolerances.
- Low maintenance design delivers 100% duty cycle in all environmental conditions.
- Insensitive to dust, humidity & temperatures from – 20°C up to approx. +70°C.
- Cast iron housing suitable for severe conditions.
- ATEX Approved models for use in dangerous and explosive environments.
- Fail safe brake in case of air supply failure.
- Oil free operation allows use in clean areas.
